

FOUNDATIONS & BOULDERS

'Temcat'

Psalm 11:3 If the foundations be destroyed, what can the righteous do?

Truly, we have come to Perilous Times!!

We are living in the times that inspiration has been warning about for hundreds and thousands of years. Times when the Four Angels are holding with all their might because each day brings events that could destroy man from this planet or blot God's truth from the minds of men!

Over and over the Bible has warned for thousands of years to be sure of our Foundation! And the Spirit of Prophecy writings have enforced this, emphasizing that ONLY those who STUDY and LEARN truth for themselves - will make it through!

We MUST have a foundation of truth, deep wide and broad. Only then can we see the delusions that are threatening to smother the 'very elect' even in the 'church' today. And yet as I communicate with SDAs from various places and circumstances, I am forced to see that pitifully few have that SOLID foundation, and most have no foundation in truth at all, but are leaning on the shifting sands of 'what the pastor says'.

Years ago, I was being oriented to a job as an Emergency Nurse in a large city hospital. One of the things we were shown was a film informing us of the emergency plan of this large city. In the event of a state of emergency, crisis, or enemy attack, there was a rather small, not very flashy looking, building that unbeknown to most people, housed all the communications equipment to co-ordinate efforts in a crisis.

It was of vital importance that this building be protected from attack, as if the enemy were to wipe it out, emergency services would be left in uncoordinated confusion. In the film we saw the interesting source of protection for this nerve-center. It was placed so that it could only be attacked on one side, and in front on that side were a few HUGE boulders! They were landscaped in there and did not look strange, but they were large enough, solid enough and deep enough that no bulldozer, and likely no tank, could get past them.

In the times we are in, more and more of the faithful are waking up to what is being corrupted and stolen out from under our very noses. The first reaction of those who awaken as out of sleep and gaze in horror on some new face of apostasy, is to run to the elder or pastor and pour out their concerns.

When this happens, most are brushed aside like a pestersome fly, but if they persist, then they are bulldozed. Yes bulldozed right into the ground! A few months ago I obtained a picture of a young girl who was literally bulldozed into the ground! Her crushed and bleeding form was no more pitiful than so many honest laypersons that find themselves attacked by leadership, as if *they* were the enemy of all righteousness, while the wickedness they are trying to point out, is excused, lauded or extolled!

Now IF they have a Foundation; IF they have the BOULDERS out front; THEN they cannot be bulldozed into the ground! Then they KNOW what is truth and can stand against all the lies, insinuations, accusations, and rubbish that can be thrown at them. And yet most find themselves busy at mundane things in the home, church, and workplace and have 'NO TIME' to study as they ought.

Foundations and Boulders

Friends, this is 'NO TIME' to have 'NO TIME'! Very soon the crisis will break, and the enemy pour down upon us. If the BOULDERS are not there, IF the Foundation is not solid, we will NOT stand.

I want to urge each one of you, PRAY, ask God to show *you* where you are wasting precious probationary time! Then get the BOULDERS out front, by redeeming that time and study three things; yes three things; The Authorized King James Bible, the only English Bible of Protestantism; The Spirit of Prophecy Writings, not compilations, but the BOOKS, testimonies, Great Controversy, Christ's Object Lessons— books like that! Don't read about them from some other author; READ THEM for yourself! You can also get the KJV Bible on cassette tapes and the SOP books on Audio tapes or CDs, these can be listened to while you rest, drive or work.

Last but not least, you need to be aware of certain history, because without knowing it, you are in a bewildering fog of uncertainty, trying to understand the attacks of today. Temcat has made available certain eBooks online that most of you would not have access to otherwise, books that give clearly the very history that you need to be able to understand, I urge you to read these without delay; read them carefully and prayerfully. They will give you a foundation of knowledge; they will put the BOULDERS out front!
