

## **Food Poisoning: MSG even in coffee... AND IN ALMOST 7000 PROCESSED FOODS AT THE LAST COUNT!**

Most of us have known this, but it is a good reminder for us to remember ,. that they sell the foods, & snacks for a profit and not for our welfare.

25 years ago in Texas, four of us went to dinner at Dr. Hoagley Woagley's Texas Barbecue in California. We all ordered different meals in order to test them. I ordered Roast Beef and everyone raved about how TENDER it was.....within an hour I became deathly ill. I felt as though my heart was totally dry and very painful. We rushed home and I drank my old fashioned remedy against food poisoning - apple cider vinegar, honey and water - and slowly I returned to normal. My roast beef must have been overloaded with MSG, but I have been grateful because I was aware.

However, it is almost impossible to avoid all MSG - See my website below for Old Fashioned Remedies! This kept us out of the hospital twice on cross country trips when we got bad food - and kept us out of the hospital!

The best way you can help to save yourself and your children from this drug-induced epidemic, is to forward this email to everyone! With any luck, it will circle the globe before politicians can pass the legislation protecting those who are POISONING US! Imagine if big tobacco had a bill like this in place before someone blew the whistle on Nicotine?

We the public, do not want to be rats in one giant experiment and we do not approve of food that makes us into a nation of obese, lethargic, addicted sheep, feeding the food industry's bottom line, while waiting for the heart transplant, diabetic induced amputation, blindness or other obesity induced, life threatening disorders.

Lois

This e-mail might save your life. At any rate it will inform you about things which can endanger your health & well being!

MSG - used in Coffee - (read this for sure) please read this. It is startling!!

Food additive "MSG" is a Slow Poison.  
Slow Poisoning MSG hides behind 25 or more names, such as "Natural flavoring".

MSG is also in your favorite Tim Horton's and other brand coffee shops!

Pass this on to those who still may be unaware or disbelieving of the dangers of MSG.

I wondered if there could be an actual chemical causing the massive obesity epidemic, so did a friend of mine, John Erb. He was a research assistant at the University of Waterloo in Ontario, Canada, and spent years working for the government. He made an

amazing discovery while going through scientific journals for a book he was writing called "The Slow Poisoning of America".

In hundreds of studies around the world, scientists were creating obese mice and rats to use in diet or diabetes test studies. No strain of rat or mice is naturally obese, so the scientists have to create them. They make these morbidly obese creatures by injecting them with MSG when they are first born. The MSG triples the amount of insulin the pancreas creates; causing rats (and humans?) to become obese. They even have a title for the fat rodents they create: "MSG-Treated Rats".

I was shocked too. I went to my kitchen, checking the cupboards and the fridge... MSG was in EVERYTHING!!

The Campbell's soups, the Hostess Doritos, the Lays flavored potato chips, Top Ramen, Betty Crocker Hamburger Helper, Heinz canned gravy, Swanson frozen prepared meals, Kraft salad dressings, especially the 'healthy low fat' ones. The items that didn't have MSG marked on the product label had something called "**Hydrolyzed Vegetable Protein**", which is just another name for **Monosodium Glutamate**.

It was shocking to see just how many of the foods we feed our children everyday are filled with this stuff. They hide MSG under many different names in order to fool those who carefully read the ingredient list, so they don't catch on. (Other names for MSG: '**Accent**' - '**Ajinomoto**' - '**Natural Meat Tenderizer**' etc) But it didn't stop there.

When our family went out to eat, we started asking at the restaurants what menu items had MSG. Many employees, even the managers, swore they didn't use MSG. But when we ask for the ingredient list, which they grudgingly provided, sure enough MSG and Hydrolyzed Vegetable Protein were everywhere.

Burger King, McDonalds, Wendy's, Taco Bell, every restaurant, even the sit down ones like TGIF, Chilis', Applebees and Denny's use MSG in abundance. Kentucky Fried Chicken seemed to be the WORST offender: MSG was in every chicken dish, salad dressing and gravy. No wonder I loved to eat that coating on the skin, their secret spice was MSG!

So why is MSG in so many of the foods we eat? ... Is it a preservative or a vitamin??

Not according to my friend John. In the book he wrote, an expose of the food additive industry called "The Slow Poisoning of America" he said that **MSG is added to food for the addictive effect it has on the human body.**

<http://www.spofamerica.com/>

Even the propaganda website sponsored by the food manufacturers lobby group supporting MSG at:

<http://www.msgfacts.com/facts/msgfact12.html> explains that **the reason they add it**

**to food is to make people eat more.**

A study of the elderly showed that people eat more of the foods that it is added to. The Glutamate Association lobby group says eating more benefits the elderly, but what does it do to the rest of us?

'Betcha can't eat just one', takes on a whole new meaning where MSG is concerned!  
And we wonder why the nation is overweight?

The MSG manufacturers themselves admit that it addicts people to their products. It makes people choose their product over others, and makes people eat more of it than they would if MSG wasn't added.

**Not only is MSG scientifically proven to cause obesity, it is an addictive substance!**

Since its introduction into the American food supply fifty years ago, MSG has been added in larger and larger doses to the pre-packaged meals soups, snacks and fast foods we are tempted to eat everyday. The FDA has set no limits on how much of it can be added to food.

They claim it's safe to eat in any amount. How can they claim it safe when there are hundreds of scientific studies with titles like these? The monosodium glutamate (MSG) obese rat as a model for the study of exercise in obesity'.

Gobatto CA, Mello MA, Souza CT, Ribeiro IA. Res Commun Mol Pathol Pharmacol. 2002.

Adrenalectomy abolishes the food-induced hypothalamic serotonin release in both normal and monosodium glutamate-obese rats'.  
Guimaraes RB, Telles MM, Coelho VB, Mori C, Nascimento CM, Ribeiro Brain Res Bull. 2002 Aug.

Obesity induced by neonatal monosodium glutamate treatment in spontaneously hypertensive rats: an animal model of multiple risk factors'.  
Iwase M, Yamamoto M, Iino K, Ichikawa K, Shinohara N, Yoshinari Fujishima Hypertens Res. 1998 Mar.

Hypothalamic lesion induced by injection of monosodium glutamate in suckling period and subsequent development of obesity'.  
Tanaka K, Shimada M, Nakao K Kusunoki Exp Neurol. 1978 Oct.

Yes, that last study was not a typo, it WAS written in 1978. Both the **"medical research community" and "food manufacturers" have known about MSG's side effects for decades!**

Many more studies mentioned in John Erb's book link **MSG to Diabetes, Migraines and headaches, Autism, ADHD and even Alzheimer's.**

But what can we do to stop the food manufactures from dumping fattening and addictive MSG into our food supply and causing the obesity epidemic we now see?

Several months ago, John Erb took his book and his concerns to one of the highest government health officials in Canada. While sitting in the Government office, the official told him "Sure I know how bad MSG is, I wouldn't touch the stuff!" But this top level government official refused to tell the public what he knew.

The big media doesn't want to tell the public either, fearing legal issues with their advertisers. It seems that the fallout on fast food industry may hurt their profit margin. The food producers and restaurants have been addicting us to their products for years, and now we are paying the price for it. Our children should not be cursed with obesity caused by an addictive food additive. But what can I do about it?... I'm just one voice!

**What can I do to stop the poisoning of our children, while our governments are insuring financial protection for the industry that is poisoning us!**

This e-mail is going out to everyone I know in an attempt to tell you the truth that the corporate owned politicians and media won't tell you.

The best way you can help to save yourself and your children from this drug-induced epidemic, is to forward this email to everyone. With any luck, it will circle the globe before politicians can pass the legislation protecting those who are poisoning us.

The food industry learned a lot from the tobacco industry. Imagine if big tobacco had a bill like this in place before someone blew the whistle on Nicotine?

**PLEASE NOTE:** If you are one of the few who can still believe that MSG is good for us, and you don't believe what John Erb has to say, see for yourself. Go to the National Library of Medicine, at <http://www.pubmed.com/> Type in the words "MSG Obese" and read a few of the 115 medical studies that appear.

**We the public, do not want to be rats in one giant experiment and we do not approve of food that makes us into a nation of obese, lethargic, addicted sheep, feeding the food industry's bottom line, while waiting for the heart transplant, diabetic induced amputation, blindness or other obesity induced, life threatening disorders.**

With your help we can put an end to this poison. Do your part in sending this message out by word of mouth, e-mail or by distribution of this print-out to all your friends all over the world and stop this 'Slow Poisoning of Mankind' by the packaged food industry. Blowing the whistle on MSG is our responsibility, get the word out.
